Career Objective

A highly skilled **UI Developer** with extensive experience in creating responsive, user-friendly web interfaces across various platforms. Proficient in **HTML/HAML**, **SCSS**, **Tailwind CSS**, and **Bootstrap**, with a strong focus on building reusable, scalable, and maintainable components. Experienced in collaborating with cross-functional teams to integrate front-end designs with backend technologies, ensuring seamless functionality and an enhanced user experience. Demonstrated success in optimizing performance, improving site responsiveness, and driving user engagement across mobile and desktop devices. Adept at utilizing modern UI/UX principles to deliver visually appealing and interactive web applications.

Skills

- | | |
|------------------------------|----------------------------------|
| • HTML - 4+ years | • Tailwind CSS - 2+ years |
| • Haml - 3+ years | • Bootstrap - 4+ years |
| • React JS - 1+ years | • Material UI - 2+ years |
| • CSS - 4+ years | • Sketch - 3+ years |
| • SCSS - 4+ years | • Figma - 3+ years |
| • Webflow - 1+ years | • git - 2+ years |

Work Experience

• **Square63 – Lahore, Pakistan (June 2021 – Present)**

Position: Software Engineer (Design)

- Over 3 years of experience delivering high-quality projects, consistently meeting deadlines and exceeding client expectations.
- Collaborate effectively with **PHP**, **React**, and **Ruby on Rails (ROR)** teams to ensure seamless integration of design and functionality.
- Specialized in crafting **responsive** and **adaptive designs**, ensuring optimal user experience across a wide range of devices and screen sizes.
- Committed to developing **scalable** and **reusable code**, driving long-term efficiency and maintainability in all design and development efforts.

• **Freelancing – Lahore, Pakistan (February 2020 – June 2021)**

Position: Web Designing

- Delivered custom web designs with a focus on scalability and reusability, utilizing **Bootstrap**, **CSS**, and **SCSS** for responsive layouts.
- Developed clean, maintainable code to ensure seamless functionality across different platforms and devices.

Projects (PHP/Drupal)

- **FAX Real Estate** – (<https://faxrealestate.com>)

Position: UI Developer

- Collaborated closely with the PHP/Drupal development team to create and implement a responsive, user-friendly marketing website.
- Developed and optimized the website using **Bootstrap** and **SCSS**, ensuring seamless responsiveness across a wide range of devices, including desktops, tablets, and smartphones.
- Enhanced the site's visual appeal and usability by applying modern UI/UX design principles and best practices.

- **Yourefolio** – (<https://yourefolio.com>)

Position: UI Developer

- Designed and implemented the front-end of a responsive wills and asset management system with interactive planning modules, ensuring compatibility across a wide range of devices.
- Developed responsive and visually appealing web interfaces using **Bootstrap**, **SCSS**, and modern UI/UX principles.
- Collaborated with the team to create scalable design solutions, resulting in the platform's growth from a single website to over 75+ dedicated private-label clients and thousands of main application users.
- Streamlined front-end development workflows, ensuring efficient debugging, documentation, and deployment processes.

- **Center of Hope Haiti** – (<https://www.centerofhope-haiti.org>)

Position: Co-developer

- Contributed to minor front-end enhancements, improving site responsiveness and user experience for a non-profit organization.
- Supported the team in maintaining code quality and implementing small optimizations..

- **CreativeFaze** – (<https://www.creativefaze.com>)

Position: UI Developer

- Designed and developed responsive and visually engaging web interfaces for client projects, ensuring compatibility across various devices.
- Collaborated with cross-functional teams to implement user-friendly layouts using **Bootstrap**, **SCSS**, and modern design frameworks.
- Contributed to improving UI/UX elements, focusing on delivering seamless navigation and accessibility for end-users.
- Assisted in debugging and optimizing front-end code for better performance and faster load times.

Projects (PHP/Laravel)

- **CPEC** – (<https://cpec-liver.com>)

Position: UI Developer

- Designed and implemented responsive user interfaces for a medical administration platform built on **Laravel**, ensuring seamless functionality across devices.
- Developed intuitive layouts and interactive components using **Bootstrap** and **SCSS**, tailored for medical professionals and administrators.
- Collaborated with the backend team to integrate front-end designs with **Laravel** features, enhancing user experience and accessibility.
- Focused on optimizing UI for performance, ensuring fast load times and a user-friendly experience.

- **Shayar** – (<https://shayar.ae>)

Position: UI Developer

- Designed and developed responsive, visually appealing user interfaces for the **Shayar** platform, built with **Laravel**, ensuring a seamless experience across all devices.
- Utilized **Bootstrap** and **SCSS** to create intuitive layouts, focusing on enhancing user engagement and accessibility.
- Collaborated with the backend team to integrate front-end designs with Laravel features, improving functionality and site performance.
- Optimized UI elements for faster load times and smooth interactions, ensuring a high-quality user experience across both desktop and mobile platforms.

Projects (WordPress)

- **Super 7 Estate** – (<https://super7realestate.com/>)

Position: UI Developer

- Redesigned and enhanced the user interface for a real estate website originally built on **WordPress**, ensuring a modern, responsive design across all devices.
- Optimized site performance and responsiveness to ensure quick loading times and seamless user experience across desktop and mobile platforms.
- Worked closely with the team to ensure the front-end design integrated well with the WordPress backend, improving overall functionality and user engagement.

Projects (ROR)

- **Slyng** – (<https://slyng.com>)

Position: UI Developer

- Designed and implemented responsive, user-centric interfaces for the **Slyng** platform, using **HAML** and **SCSS** to create clean, maintainable code.
- Developed and customized the front-end components to ensure optimal performance across various devices, leveraging modern web design principles.
- Collaborated with the team to create interactive and visually appealing layouts, improving the overall user experience.
- Focused on streamlining the development process by optimizing SCSS code for faster rendering and efficient styling across the site.

- **CT Health News** – (<https://cthealthnews.com>)

Position: UI Developer

- Designed and developed responsive user interfaces for the **CT Health News** platform built with **Ruby on Rails (RoR)**, ensuring seamless functionality across all devices.
- Utilized **Tailwind CSS** to create custom, utility-first styles that enhanced the website's visual appeal while maintaining flexibility and responsiveness.
- Worked closely with the development team to integrate front-end designs with RoR backend, optimizing user experience and site performance.
- Focused on improving UI/UX by implementing fast-loading pages and interactive components for a smooth, engaging experience on both desktop and mobile platforms.

Projects (React JS)

- **Who Does Your Hair** – (<https://whodoesyourhair.com>)

Position: UI Developer

- Designed and developed responsive, reusable UI components for the **Who Does Your Hair** platform using **React**, ensuring a seamless experience across various devices.

- Styled and customized the components with **Tailwind CSS**, utilizing its utility-first approach to create a flexible, consistent design that adapts to different screen sizes.
- Focused on building a scalable and maintainable front-end architecture, enhancing usability and interactivity across various devices.

Certifications

- **HTML & CSS in depth** ([Coursera](#))
 - Gained a comprehensive understanding of **HTML** and **CSS**, including advanced concepts and best practices for creating responsive, accessible, and visually appealing websites.
 - Learned how to structure web pages effectively, apply styling techniques, and optimize designs for different devices and screen sizes.
- **Webflow** ([Coursera](#))
 - Learned the use of **Webflow** for designing, developing, and launching responsive websites without coding.
 - Gained expertise in creating visually dynamic, interactive web experiences using Webflow's design tools and CMS.
 - Learned how to implement custom animations, transitions, and interactions to enhance user engagement and site functionality.
- **Introduction to Front-end** ([Coursera](#))
 - Acquired foundational knowledge in **front-end development**, including HTML, CSS, and JavaScript.
 - Gained hands-on experience in creating interactive web pages, focusing on web design principles and best practices.
 - Learned to build responsive websites that adapt to various screen sizes and devices, enhancing user experience across platforms.

Academic Qualifications

- **B.Com, Punjab College.**
 - Completed a Bachelor of Commerce degree, gaining a solid foundation in business principles, accounting, finance, and economics.
 - Developed strong analytical and problem-solving skills, which complement technical expertise in web development and design.

Personal Information

Date of birth	February 15, 1992
Gender	Male
